Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The limitation of dynamic adjustment of the camera was discussed. The examiner explained how the combination of Kato and Riconda met this limitation, and while the applicant understood the examiner's point they felt that the invention was different from the cited art. The examiner suggested that the applicant amend the claims to better describe the combination of static and dynamic adjustments as to get around the cited art, to which the applicant agreed.
